11 July 1984

OC-MLS WEEKLY STAFF NOTES
FOR WEEK OF 2-6 JULY 1984

1. A memorandum was distributed to all FAN Managers outlining a plan of action to bring the execution of the FY-84 budget to a successful conclusion. Three specific activities were identified: scheduling the closing of FAN accounts with minor balances; improving the accuracy of obligations, commitments, and encumbrances; and consistent attention to financial details in year-end spending.

2. In response to an "eleventh hour" crash requirement for OC input into a Terrorism/Counter Terrorism initiative, a concept paper was prepared outlining the support that could be provided and the resources that would be required.

5. OD&E advised that GTE would like to provide a briefing on high data rate, dynamic switches. SINAG accepted the offer and will notify personnel who may be interested in attending.

6. On 12 July, Chief, IMS/FSG, members of FND/SOG/FEB, and the OC CRAFT Program Manager will meet to work out a modus operandi which will allow OC to assume total management of the maintenance program for the CRAFT project and for Wang equipment used in non-CRAFT applications overseas and at certain domestic sites.
